

Laguso fabrics are quick and easy to care for.

They can be washed by hand, in the washing machine,
or dry-cleaned.

Please take care while washing in the machine,
to only use the care wash cycle with 30 degrees.

Do not dry in the dryer,
the clothes are extremely quick-drying.
Simply dry them on the drying rack or use a hanger.

Sports detergent should always be used,
to obtain the breathability of the fiber.

We recommend for the colour fastness a colour catching cloth,
to avoid discoloration from darker to lighter colours
and for the colours themselves to stay beautiful even longer.
